DETAILED ACTION

Election/Restrictions

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
 - I. Claims 1, 3-33, 35-47, 49-52 drawn to method and apparatus for measuring a parameter of a circuit under test, classified in class 324, subclass 678.
 - II. Claims 53, 55-76, 78-98 drawn to computer readable storage medium and processor classified in class 702, subclass 60.

Distinctness

2. Inventions I and II are related as process and apparatus for its practice. The inventions are distinct if it can be shown that either: (1) the process as claimed can be practiced by another materially different apparatus or by hand, or (2) the apparatus as claimed can be used to practice another and materially different process. (MPEP § 806.05(e)). In this case the process as claimed can be practiced by another materially different apparatus which does not require a computer or by hand.

Why Restriction is Proper

3. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

Art Unit: 2858

A telephone call was made to attorney Thomas J. D'Amico on 5/12/04 to request an oral election to the above restriction requirement, but did not result in an election being made.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).
